

World Environment Day Events - WED 2016

Trash to Treasure Innovation Competition

AIMST University is celebrating the 'World Environment Day' on 22nd September 2016 as an awareness to sustain the earth values. Trash to Treasure Innovation Competition will be a part of the event to enlighten the objective of the World Environment Day celebration. This competition is targeting school students as major participants. This competition also plays an important role in the development of recycling and innovation skills among students. Promoting recycling offers other important economic and social benefits: generating economic growth and fostering innovation.

Recycling contributes to a green economy in numerous ways, including enhancing resource efficiency and reducing environmental impacts. Making new products out of recycled materials reduces the need to consume precious resources. So, recycling helps protect raw materials and protect natural habitats for future generations. Recycling also reduces the need for extracting (mining, quarrying and logging), refining and processing raw materials all of which create substantial air and water pollution.

The winners will be awarded with prizes, medals and certificates as follows:

School Level

Champion	Prizes, Medals and Certificates
1 Runner-up	Prizes, Medals and Certificates
2 Runner-up	Prizes, Medals and Certificates

University Level

Champion	Prizes, Medals and Certificates
1 Runner-up	Prizes, Medals and Certificates
2 Runner-up	Prizes, Medals and Certificates

Tentative Program

Date : 22 September 2016
